Dear Mr. Mitnick,

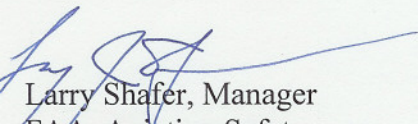

We would like to thank you and Alex Kasperavicius for coming to the Mike Monroney Aeronautical Center on December 14, 2006 to present your one-day Social Engineering Workshop to the Federal Aviation Administration. Please accept the enclosed certificates as tokens of our appreciation for your efforts.

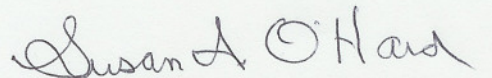

Your attention to detail in preparing for this course did not go unnoticed. The presentation was very thorough and was given in a professional and interesting manner. The comprehensive course guides you provided are of high educational quality and were delivered before the course, which helped the class day run smoothly. Finally, your numerous real-time exercises were exciting to watch and participate in for all involved.

Again, thank you for your time and hard work. Your excellent presentation, friendly yet professional disposition, and spark for the love of psychology and technology intertwined helped us to understand that our security training should focus not only on physical security, but the security related to the actions of our personnel as well. We will encourage all employees to implement the precautionary tactics you introduced us to during the workshop right away.

We wish you the best of luck in your future endeavors.

Sincerely,

Larry Shafer, Manager
FAA, Aviation Safety
IT Operations Branch

Susan O'Hara, Computer Specialist
FAA, Aviation Safety
IT Operations Branch
